

OnDemand Specialty System

Key Specifications

Depth Rating: 60m / 200ft

Maximum Tether Length: 2,130m / 7,000ft

Maximum Speed: 9m / 30ft per minute

Vehicle Payload: up to 180kg / 400lb

Front Facing Camera: Spectrum 90™

Optional: Spectrum 120HD™ high definition main camera, middle and/or rear Crystal Cam®

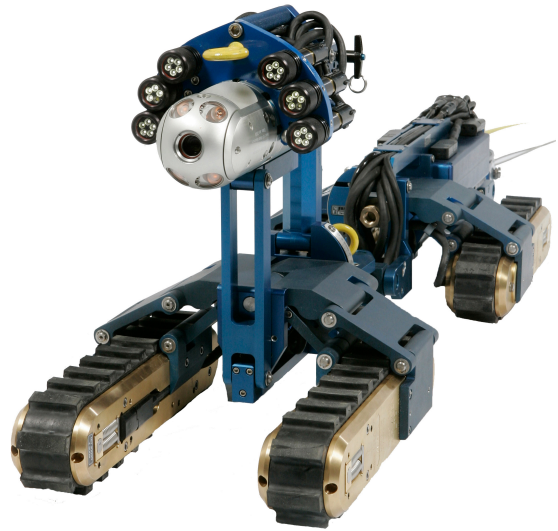

Operating Temperature: 0°-40° C / 32°-104° F

Vehicle Weight: 104kg / 230lb

Vehicle Dimensions: 1651x371x434mm / 65x14.6x17.1in

Standard Components: 4 x 7000 series Minitracs™, 1 x Spectrum 90™ camera, 2 x 901 lights, parallel chassis and wiring harness, 2,130m / 7,000ft tether, AC winch, Versatrax™ power supply / controller in a Pelican® case with Digital Video Recorder and sunlight readable monitor.

Versatrax 300™ (VT300)

Industries & Applications

- Military/Security
- Mining
- Municipal (Sewer/Water)
- Oil & Gas (Onshore/Offshore)
- Petrochemical

The Versatrax 300™ is the solution to long range pipe inspection challenges. Able to inspect more than two kilometres of pipe in a single run, the VT300 includes up to three onboard video cameras, multiple sensor options, and is operable in pipe as small as 300mm / 12in internal diameter.

Versatile and customizable, the Versatrax 300™ can deploy sensors and tooling in even the most remote and unaccommodating environments and locations. All units are configurable for round pipe or flat surface operation, and adjustable for a range of diameters.

Whatever your remote testing, assessment or construction needs — from video and sonar, to lasers and multi-sensor inspection — the VT300 delivers, with ultra long-range capability, extra payload capacity and friendly, intuitive control systems.

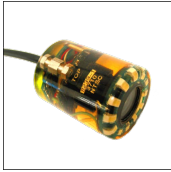

"Inuktun brings a concept to life with flexibility, innovation and ingenuity."

– Robert de Haas, Versatrax 300™ operator, Pacific Gas and Electric Company

STANDARD IM3 OPTIONS

Custom configurations:
See dealer for details

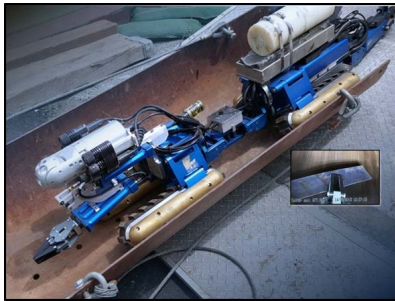

Crystal Cam®
Middle or rear-facing camera for comprehensive remote inspection

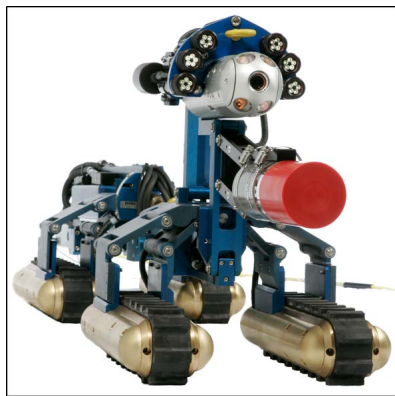

Spectrum 120™
Enhanced zoom capability up to 432x

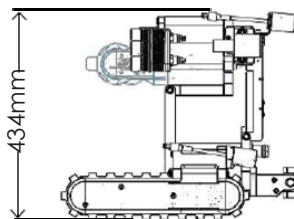

Spectrum 120HD™
High definition 1080p video quality for more detailed inspection

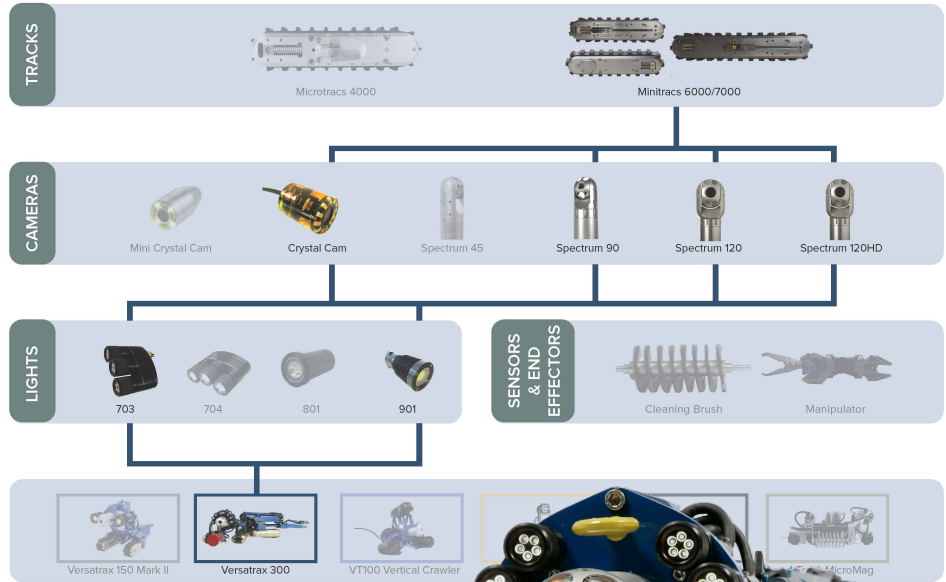

Tooling Integration
Combine tooling requirements for remote handling and retrieval operations.

Sensor Integration
Easy integration such as sonar, NDT sensors, lasers and chemical sensors.
